PROPOSAL · V1.0

AMMAN, JORDAN

PREPARED FOR · JUNE 2026

Digital Presence & *AI Smile* Experience

A bilingual, editorial-grade website with a signature AI smile preview — designed to win trust before the first visit and turn quiet curiosity into booked appointments.

Dr. Sumaya Dental Clinic

عيادة الدكتورة سمية أبوعودة · عمان

A presence as refined as the *work itself*.

Patients today choose a clinic long before they call. They scroll, they compare, they judge in seconds — and a beautiful smile deserves a first impression that feels just as considered.

Dr. Sumaya's clinic already delivers exceptional cosmetic results. This proposal gives that craft a digital home to match: a calm, confident, Arabic-first website with one feature no competitor in Amman offers — an AI that lets a patient **see their new smile in seconds**.

The result is not a brochure. It is a quiet sales engine that works while the clinic sleeps.

01

Earn trust instantly

An elegant, fast, bilingual site that signals quality and care before a word is spoken.

02

Convert curiosity to bookings

A frictionless path from "I'm curious" to a confirmed appointment, on any device.

03

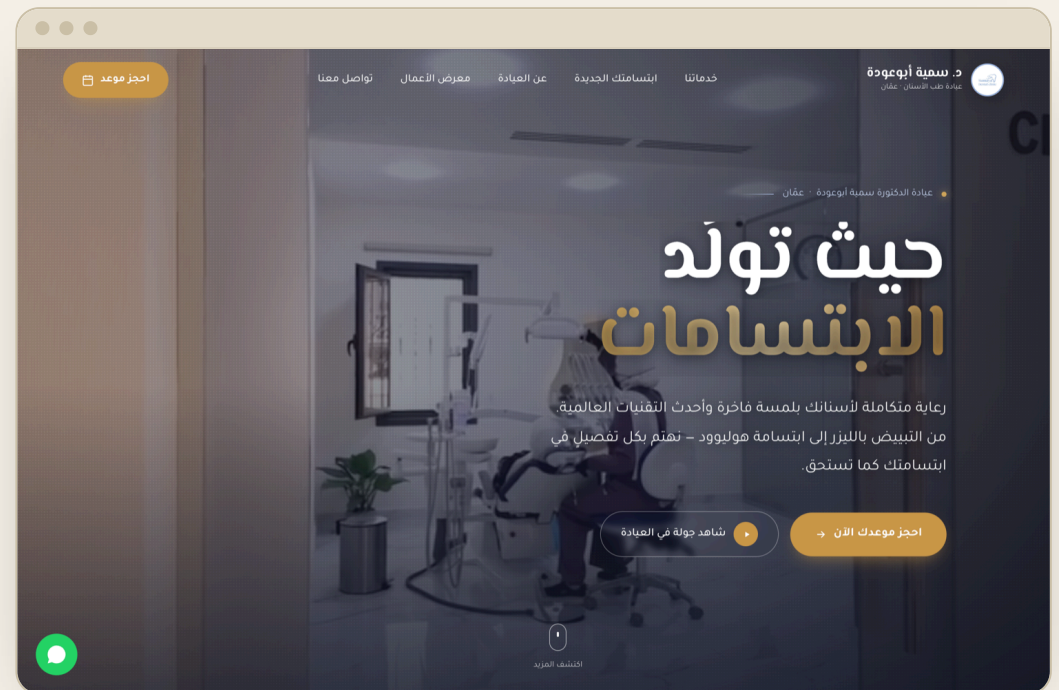

Own a signature experience

An AI smile preview that becomes the reason people share, talk about, and remember the clinic.

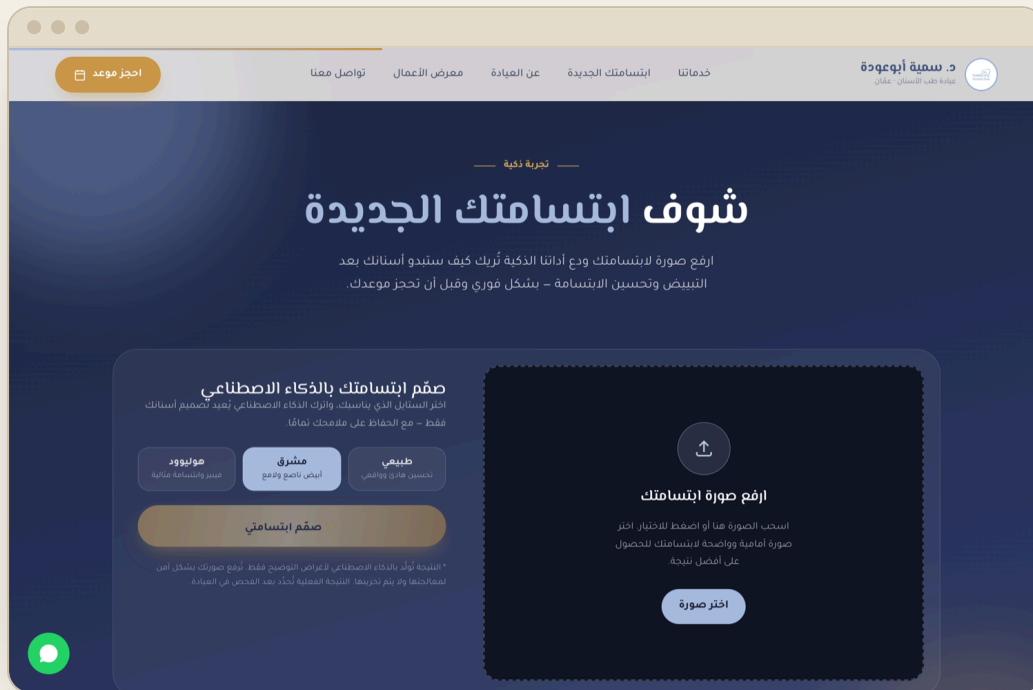

One refined, bilingual home — *built to convert.*

A single, cinematic, Arabic-first (RTL) website that carries the brand from the first second — and guides every visitor gently toward booking.

- **Cinematic arrival.** A refined intro and hero that set a premium tone immediately.
- **Arabic-first, fully bilingual-ready.** Native RTL typography and layout that feel local and luxurious.
- **The full story.** Services, about, real before/after gallery, and patient trust — in one elegant scroll.
- **Effortless booking.** A clear, friendly path to request an appointment from any section.
- **Fast & flawless on mobile.** Polished down to the smallest phone, where most patients arrive.

See the smile *before the chair.*

The clinic's signature feature — and its biggest differentiator. A patient uploads a photo, picks a style, and watches an AI redesign only their teeth in seconds.

- **Powered by Google Gemini.** State-of-the-art image intelligence, integrated through a secure private endpoint.
- **Teeth only — face untouched.** Whitening, alignment, veneers & Hollywood styles, with every original feature preserved.
- **Instant before / after.** A tap to compare, and a one-click download to keep — and to share.
- **A booking magnet.** Curiosity becomes desire becomes an appointment — the strongest call-to-action a clinic can own.

04

Scope & *deliverables.*

DESIGN

A

- Brand-aligned art direction
- Arabic-first (RTL) layout system
- Editorial typography & color
- Cinematic intro & hero
- Responsive design, mobile→desktop

WEBSITE BUILD

B

- Services, About, Gallery sections
- Before/After media gallery
- Appointment booking flow
- Smooth motion & interactions
- Performance & SEO foundations

AI SMILE ENGINE

C

- Secure serverless API endpoint
- Teeth-only editing prompt system
- Natural / Bright / Hollywood styles
- Before/after & image download

CONTENT & BOOKING

D

- Section copy refinement (AR)
- Gallery curation & placement
- Booking & WhatsApp call-to-action
- Trust & credibility elements

LAUNCH

E

- Deployment & domain setup
- Cross-device QA & testing
- Analytics-ready handover
- Source code ownership

CARE — OPTIONAL

F

- Hosting & AI usage management
- Updates & small changes
- Monitoring & backups
- Priority support

How we *work*.

Four measured phases — the same method behind every stak studio commission. Patiently, precisely.

PHASE 01

1

Listen

We learn the clinic, its patients, and what makes its work different — then define the goals the site must achieve.

WEEK 1 • DISCOVERY

PHASE 02

2

Compose

Art direction, layout and tone. We shape how the brand looks, reads and feels across every screen.

WEEK 1-2 • DESIGN

PHASE 03

3

Forge

Engineering the site and the AI smile engine — built to be fast, durable and genuinely owned by the clinic.

WEEK 2-4 • BUILD

PHASE 04

4

Finish

Testing, refinement, deployment and a calm handover — every detail signed before it ships.

WEEK 4 • LAUNCH

06

Investment.

DELIVERABLE	INVESTMENT
Discovery & Brand Direction Goals, art direction and the visual system for the site.	250 JOD
Bilingual Editorial Website Full Arabic-first (RTL) design & build — all sections, gallery, booking, responsive.	1,200 JOD
AI Smile Generator Google Gemini integration, secure serverless API, styles & before/after.	800 JOD
Deployment, QA & Handover Launch, cross-device testing, domain setup and source-code ownership.	250 JOD

ONE-TIME TOTAL

2,500 JOD

Indicative figures, in Jordanian Dinar, exclusive of any applicable taxes. A 50% deposit begins the work; the balance is due at launch. Gemini AI usage is billed at provider cost or covered under the Care plan.

OPTIONAL · ONGOING

Care, Hosting & AI

65 JOD / month

- + Hosting & secure AI endpoint
- + Managed Gemini usage & monitoring
- + Small updates & content changes
- + Backups & uptime checks
- + Priority support

Cancel anytime. Month-to-month.

Let's give this smile the home it *deserves*.

01

Approve

Confirm scope and investment. A 50% deposit reserves your start date.

02

Kickoff

A short discovery call, then we begin — Listen, Compose, Forge.

03

Launch

We test, refine and deploy. The clinic goes live — and starts converting.

Patiently, precisely.
